Introducing API-As-A-Service

Don't Wait on I.T. to Deliver Data

Your customers expect consistent and relevant interactions across all touchpoints – but you can't offer that if you don't have instant access to live customer data across all of your channels. MessageGears Engage is our fast and efficient moments-based marketing engine.

Why wait on long I.T. projects to deliver data when you could have it now?

Your Moments-Based Marketing Engine

Data powers the great impressions customers have with your brand. Have all offer, user, and context data available on any channel at any time.

Instant Access to Your Data at Scale

Traffic to your messages and websites can be unpredictable, so we offer burstable API access at greater than 10,000 requests per second – meaning your data is always available to power great experiences.

Live Data Creates Consistent Experiences

Old data means you'll be missing the moment. With scheduled refreshes up to every few minutes, you can ensure that all of your data is live and as accurate as your customers expect it to be.

ACCESS AND ACTIVATE CUSTOMER DATA QUICKLY & EASILY

Visit MessageGears.com/Engage to learn more and see how you can get a free proof-of-concept or personalized demo of the product.
