# Say Goodbye to Data Friction

## MessageGears Segment

Use your on-premises data to select, filter, and deliver your recipient data to a variety of downstream systems. Detailed reporting metrics allow the user to see how many recipients went to each source, and consume any interaction or enriched engagement data from those third parties.

## MessageGears Message

Stop letting ESPs and Marketing Clouds hold you back. Message is a one-of-a-kind cross-channel orchestration product that connects to your customer data and helps you build personalized messaging campaigns that deliver results.
